PROFESSIONAL SUMMARY

Data Analyst transitioning into Data Engineering, with professional experience in data preparation, validation, quality control, and business reporting. Skilled in translating client needs into data requirements, cleaning incoming social media data, and developing Power BI dashboards to support business decisions. Academic background in Artificial Intelligence Engineering and Data Science, with skills in SQL and Python and foundational knowledge of ETL/ELT, data pipelines, database management, and data warehousing. Seeking a Junior Data Engineer role to apply analytical experience and data quality discipline to building reliable data workflows

TECHNICAL SKILLS

- **Programming** : SQL, Python
- **Data Quality** : Data cleaning, validation, quality control
- **Data Engineering Foundations** : ETL/ELT, Data pipelines, Big Query, GitHub, Docker
- **Analytics** : Power BI, Tableau, Excel
- **AI** : Machine Learning, Deep Learning, NLP

PROFESSIONAL EXPERIENCE

Zanroo Thailand

DATA ANALYST

Mar 2025 - Oct 2025

- **Monitored social media mentions to analyze consumer sentiment**, brand perception, and relevant trends for client brands.
- **Defined data requirements based on client needs**, including hashtags, keywords, and topics for social media monitoring.
- **Validated and cleaned incoming data** to ensure accuracy and relevance before analysis.
- **Developed Power BI dashboards and analytical reports** covering brand and competitor performance, providing actionable insights to support clients' business decisions.

THOTH AI

Data Annotator : Labeller

Nov 2024 - Feb 2025

- **Managed and maintained data within the company's systems**, including data storage, organization, cleaning, and quality control to ensure accurate and reliable data.
- **Monitored and processed data in real time**, including identifying, removing, and reporting incorrect or unwanted data to maintain data quality.
- **Worked across different projects with varying data requirements**, adapting data processing and management methods based on project needs and frequently changing datasets.

Senior Project : Thai Sign Language Detection System

- **Developed a machine learning-based system for recognizing Thai sign language** gestures using webcam input. Utilized MediaPipe for hand landmark detection and trained/optimized the model for improved recognition performance.

EDUCATION

Bangkok University | 2020 – 2023

Bachelor of Engineering

Artificial Intelligence Engineering and Data Science
