PROFESSIONAL SUMMARY

Available to start full-time on 1 November 2026

Data Analyst transitioning into Data Engineering, with hands-on experience developing a PHP/MySQL budget management system and preparing reliable data for reporting. Offers SQL and Python skills, practical experience with operational data and reporting workflows, and foundational knowledge of ETL/ELT, data pipelines, and data warehousing.

TECHNICAL SKILLS

- **Programming & Querying:** SQL, Python, PHP
- **Databases:** MySQL,PostgreSQL, database management
- **Cloud & Data Warehouse:** Google Cloud Platform (GCP), BigQuery — Basic
- **Data Preparation:** Data cleaning, validation, organization, quality control
- **Data Engineering Foundations:** ETL/ELT, data pipelines, data warehousing
- **Reporting & Visualization:** Power BI, Tableau, Excel

PROFESSIONAL EXPERIENCE

Military Service — Budget Office Assignment

Nov 2025 – Present | Expected completion: Nov 2026

- Developed a PHP/MySQL budget management system storing user access, unit information, budget assignments, and transaction records.
- Built disbursement dashboards and consolidated withdrawal and incoming transfer data for monthly, quarterly, annual, and fiscal-year reporting.
- Automated payment request document generation and supported certification and approval workflows, reducing manual typing and speeding up administrative work.

Zanroo Thailand — Data Analyst

Mar 2025 - Oct 2025

- Translated client needs into source data monitoring requirements, including keywords, hashtags, and topics.
- Validated and cleaned incoming social media data before downstream analysis and reporting.
- Developed Power BI dashboards and analytical reports covering brand and competitor performance.

THOTH AI — Data Annotator / Labeller

Nov 2024 - Feb 2025

- Managed data organization, cleaning, and quality control within company systems.
- Identified, removed, and reported incorrect records during real-time processing; adapted methods to changing datasets and project requirements.

ACADEMIC PROJECT

Thai Sign Language Detection System — Senior Project

- Developed a webcam-based machine learning system using MediaPipe for hand landmark detection; trained and optimized the gesture recognition model.

EDUCATION

Bangkok University | 2020 – 2023

Artificial Intelligence Engineering and Data Science

GPA: 3.36/4.00
