

RUANGRIT SRIMUANG

Career focus: Data Engineer

ruangrit.works@gmail.com · +66 90 250 3250 · linkedin.com/in/ruangrit-srim2001

PROFILE

Data professional with experience in data management, data quality, and analytics. Experienced in validating and cleaning incoming data, defining monitoring requirements, and developing Power BI dashboards. Pursuing Data Engineer opportunities while continuing to develop technical skills in data engineering.

PROFESSIONAL EXPERIENCE

Zanroo Thailand — Data Analyst

March 2025 – October 2025

- Defined monitoring requirements based on client needs, including hashtags, keywords, and topics.
- Validated and cleaned incoming social media data to ensure accuracy and relevance before analysis.
- Monitored social media mentions to analyze consumer sentiment, brand perception, and relevant trends.
- Developed Power BI dashboards and analytical reports covering brand and competitor performance to support clients' business decisions.

THOTH AI — Data Annotator / Labeller

November 2024 – February 2025

- Managed and maintained data within company systems, including storage, organization, cleaning, and quality control.
- Monitored and processed data in real time, identifying, removing, and reporting incorrect or unwanted data.
- Adapted data processing and management methods across projects with varying requirements and changing datasets.

EDUCATION

Bangkok University

2020 – 2023

Artificial Intelligence Engineering and Data Science

ACADEMIC PROJECT

Thai Sign Language Detection System

Developed a machine learning-based system to recognize Thai sign language gestures using webcam input. Used MediaPipe for hand landmark detection and trained and optimized the model to improve recognition performance.

TECHNICAL SKILLS

Data analysis: SQL, Python, Excel, data cleaning.

Visualization: Power BI, Tableau.

Data engineering foundation: ETL / ELT, data pipelines, data warehouses, database management.

AI: Machine Learning, Deep Learning, NLP.
